Nutrition

As health care systems look for ways to improve the quality of care for Medicare patients, we need to implement simple, cost-effective solutions and act immediately to educate, screen and implement nutrition intervention.

31,444 Rides
Provided

Transportation

The relationship between health status and driving cessation is likely mutually causative. That is, declining health may lead to driving cessation and driving cessation in turn may result in adverse health outcomes.

2015 Consumer Snapshot

The Older Americans Act (OAA) funds critical services that keep older adults healthy and independent –services like meals, job training, senior centers, caregiver support, transportation, health promotion, benefits enrollment, and more. <https://www.ncoa.org/public-policy-action/older-americans-act>

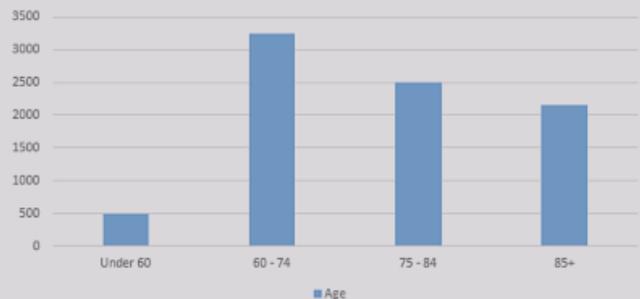

8,395 consumers were served in 2015

Women outlive their male counterparts by an average of 5 years with average ages of 81 for women and 76 for older men.
Centers for Disease Control 2012

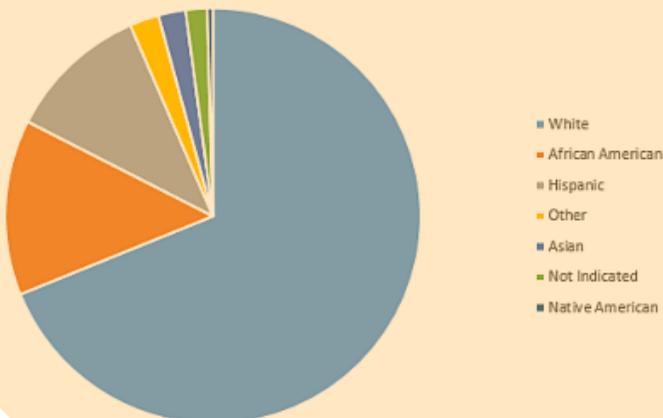

Poverty increases with age and is much more common among older women than men. Elder poverty disproportionately affects women of color and those who live alone.
